

# ENERGY SMART

## TABLETOP MANUAL DISPENSER FOR FOOD PACKAGING - STAINLESS STEEL

Ideal for the packaging of food products (fruit and vegetables, meat etc.) that need to be packaged with special food stretch film (maximum roll width 400 mm).

## DESCRIPTION

The NEW ENERGY SMART WRAPPER is an innovative system that incorporates an "Instant On" seal plate with the ability to go from ambient to sealing temperature in 3 seconds. The high speed seal plate in combinations with a photo eye actuator, allows the operator to seal a product on demand and to save energy when the wrapper is not in use.

Due to the rapid response of seal plate and residual heat existing withing plate after actuation, the seal plate heating cycle can be significantly shorter than 3 seconds, especially when the operator seals several packages in succession. A temperature control device within the seal plate regulates the temperature of the seal plate to ensure the temperature peaks at 185°C (370°F).

As a part of our quality producers, the seal plate has been thoroughly tested. It is important for the operator to manintain the non-stick cover in good condition, not only for safety, but also to protect
